DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species I, Fig. 4 in the reply filed on 8/29/2006 is acknowledged. Claims 1-12 have been cancelled by applicant and new claims 13-25 are pending and all read on the elected species.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Stephen Adrian on November 9, 2006.

The application has been amended as follows:

In claim 15, line 5, after second occurrence of the word **the**, delete "**ET**" and add **--EL--**.

In claim 16, line 5, after **driving**, delete "**ITT**" and add **--TFT--**.

In claim 19, line 5, after **wherein**, delete the rest of the claim, which are **lines 6-10**, and add **--there is provided either one of a discharge means to allow electrical discharge of charges accumulated in a parasitic capacitance of the light emitting element and a charge means which performs a charge for the parasitic capacitance of the light emitting element, at the timing at which the applying operation of the reverse bias voltage to the EL element shifts to the supplying operation of the forward current--**.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance: Claims 13-25 are allowable since certain key features of the claimed invention are not taught or fairly suggested by the prior art. In claims 13 and 19, **“either one of a discharge means to allow electrical discharge of charges accumulated in a parasitic capacitance of the light emitting element and a charge means which performs a charge for the parasitic capacitance of the light emitting element, at the timing at which the applying operation of the reverse bias voltage to the EL element shifts to the supplying operation of the forward current”**.

The prior art of record however singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ricardo L. Osorio whose telephone number is 571-272-7676.
